

DEGREES OF INV SIBILITY

Changing the way the world looks at audio.

**WHY LET ORDINARY
SPEAKERS TARNISH AN
EXTRAORDINARY ROOM?**

Sonance speakers preserve the integrity of your design.

Sonance believes there's more to exceptional speakers than sound alone. They must strike the perfect visual note as well. The shape, the size, the finish, and placement—every detail should be considered in the context of the room itself. The right choice not only complements your design, it becomes a part of the design, as deliberate and personal as the flooring below and the lighting above.

Twenty-five years after we invented the first in-wall speaker, Sonance continues to set the standard for premium loudspeakers, bridging the gap between aesthetic appeal and acoustic performance—and transforming the choice of speaker from an afterthought to an integral element of design.

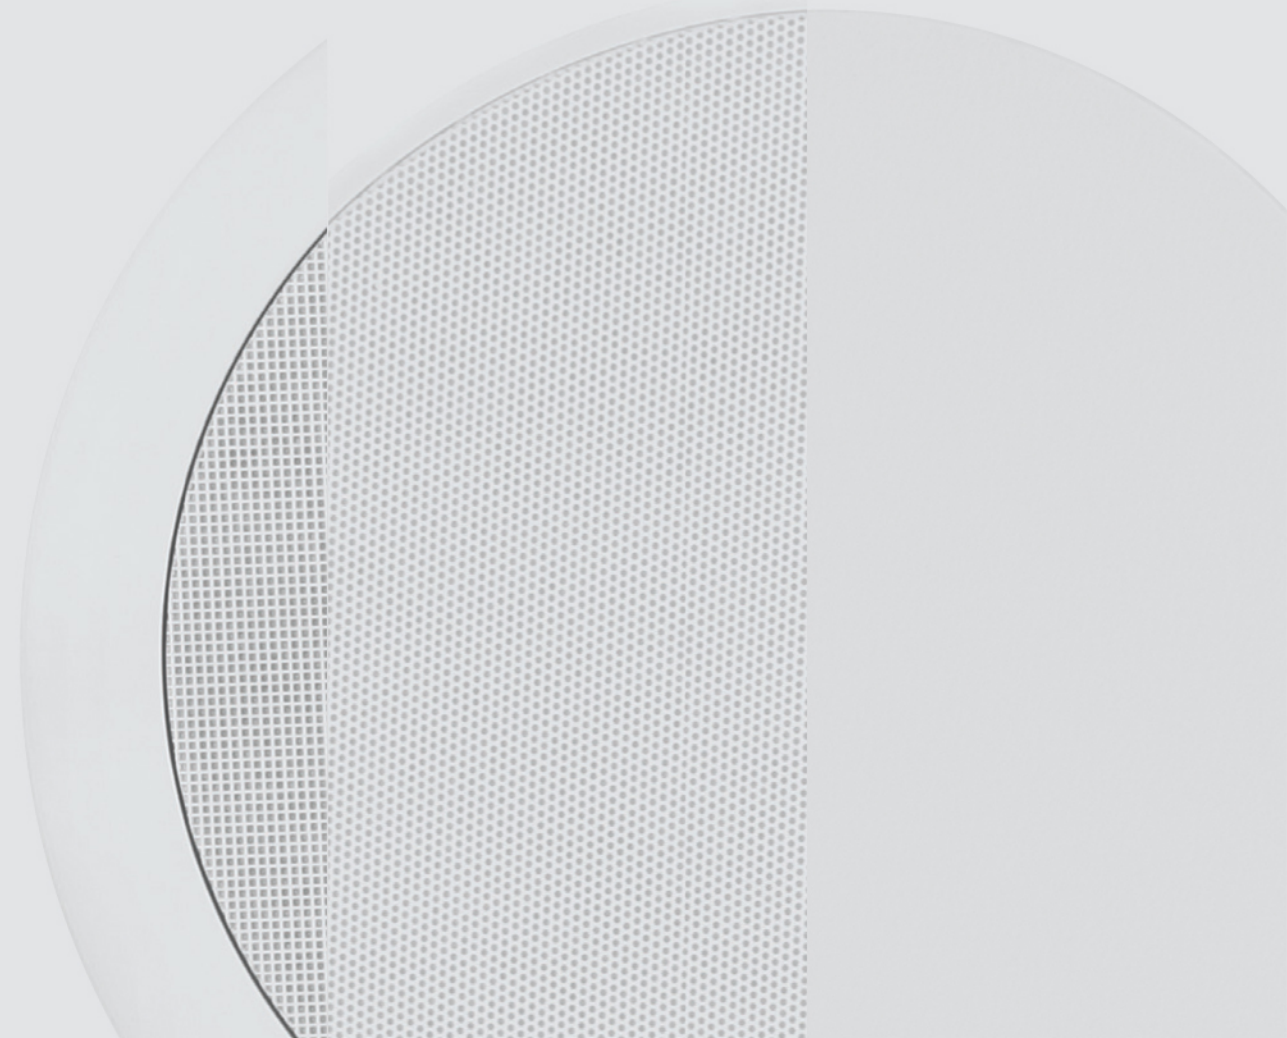

Conventional speakers are designed for the ear, not the eye. As a result, they often draw unwanted attention, creating a sense of clutter that compromises the appearance of the room.

EXTRAORDINARY ROOM?**

Sonance speakers preserve the integrity of your design.

Sonance believes there's more to exceptional speakers than sound alone. They must strike the perfect visual note as well. The shape, the size, the finish, and placement—every detail should be considered in the context of the room itself. The right choice not only complements your design, it becomes a part of the design, as deliberate and personal as the flooring below and the lighting above.

Twenty-five years after we invented the first in-wall speaker, Sonance continues to set the standard for premium loudspeakers, bridging the gap between aesthetic appeal and acoustic performance—and transforming the choice of speaker from an afterthought to an integral element of design.

SONANCE
INVISIBLE SERIES

Sonance Invisible Series speakers vanish into room designs, delivering ambient music that emanates from walls and ceilings—everywhere and nowhere at once.

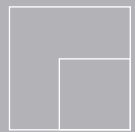

SONANCE VISUAL PERFORMANCE SERIES

Sonance Visual Performance Series delivers our legendary sound quality in an exceptionally elegant design. Micro-trim grilles, featuring just 0.2 inches of trim, attach magnetically to the speakers and can be painted in a single step to match surrounding surfaces.

SONANCE ARCHITECTURAL SERIES

Sonance Architectural Series represents a milestone in the evolution of audio—and interior design. As the world's first perfectly flush, completely trimless in-wall and in-ceiling speakers, they eliminate the shadows and seams that interrupt a room's visual flow, preserving the integrity of your design.

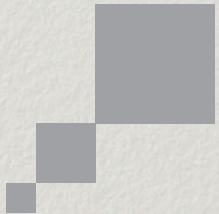

Sonance Architectural Series in-ceiling speakers beautifully complement high-end trimless lighting, reducing ceiling clutter and sightlines.

SONANCE INVISIBLE SERIES

Sonance Invisible Series marks yet another first—the total integration of speakers into walls and ceilings. Completely concealed behind plaster, paint, wallpaper and even wood veneer; they deliver remarkable sound that envelopes the entire room without revealing the source.
